

Dual-Speaker True Sound

The audio quality of HUAWEI FreeBuds Pro 2 has been comprehensively upgraded to include a **quad-magnet dynamic driver** for punchier bass, an **ultra-high frequency planar diaphragm** for detailed treble, as well as digital cross-over technology, bringing an incredibly wide range of sound from 14Hz to 48kHz, which is beyond the typical level of human hearing.

Triple Adaptive EQ

The device uses a dynamic sound effect algorithm which adapts the audio frequency in real-time to each person's ear canals, wearing status and volume level, to bring a consistent optimised listening experience.

HWA and Hi-Res Wireless Certified

HUAWEI FreeBuds Pro 2 supports high resolution audio transmission and is awarded with HWA / Hi-Res Wireless Gold Certification.

Co-Engineered with Devialet

Devialet, a high-end acoustic technology brand from France, is famous for making pure sound with "zero distortion, zero saturation, zero background noise", which aligns with Huawei's pursuit of "True Sound".

The perfect combination of acoustics and aesthetics

Iconic design for ultimate wearing experience

HUAWEI FreeBuds Pro 2 has an iconic flat stem design which gives users the perfect surface to effortlessly and accurately control the volume of their earbuds. Compared to the last generation, HUAWEI FreeBuds Pro 2 is lighter, more compact, and more comfortable to wear.

Huawei has chosen three sleek colours for the FreeBuds Pro 2.

Pure Voice Call

The new Pure Voice call feature enables users to have crystal clear voice calls even in the loudest environments, like at work, coffee shops or a noisy family home.

This is based on triple-mic call noise cancellation & bone sensor combined with Huawei-exclusive Deep Neural Network (DNN) noise cancellation algorithm, allowing the earbuds to accurately pick up human voices while eliminating background noise.

Dual-Device Connectivity & Strong Compatibility

FreeBuds Pro 2 supports simultaneous connection to two devices and automatically switches between them. It is compatible with Windows, iOS and Android.

Intelligent ANC 2.0

FreeBuds Pro 2 can intelligently adapt to the ambient noise of a user's surroundings by automatically switching between different noise cancellation modes to make sure a consistent and comfortable listening experience, whether that's in an aircraft, subway, café or library.

Long Battery Life & IP54 Water Resistance

When noise cancellation is turned on, the FreeBuds Pro 2 can play music for up to 4 hours, and up to 18 hours with the case. When the noise cancellation is turned off, the device can last up to 6.5 hours, and 30 hours with the case. The FreeBuds Pro 2 is IP54 rated for water resistance.
