

Tech that gives you time back?

6 UNMISSABLE

Pixel 11 Series Features

The latest Pixel portfolio is designed to do more for you with less from you.

With Google's full tech stack—from Tensor G6 to Android—Pixel 11 simplifies daily digital friction, so you can focus on being present in the moment.

Effortless Daily Tasks with Gemini Intelligence

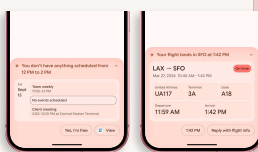

Powered by the custom Google Tensor G6 processor, **Gemini Intelligence** contextually anticipates your needs across apps to handle daily busywork without manual app-switching.

TRY IT OUT!

TRY IT OUT!

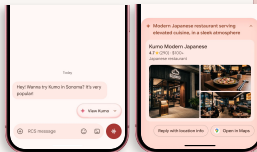

1 Coordinate dinner plans in chat

When a friend texts asking if you are free, Gemini Intelligence can suggest checking your Calendar availability directly inside the chat thread.

2 Explore places on the fly

When a friend suggests a new restaurant in a text, a Maps preview pops up in the chat showing photos of top dishes, reviews, and direct navigation options.

Clean Spoken Thoughts with Rambler

Natural speech is often informal and unstructured. Built within Gemini Intelligence, **Rambler** delivers fast, accurate voice input matching your intent by filtering out clutter.

TRY IT OUT!

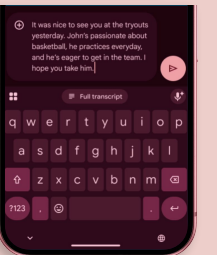

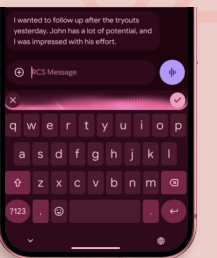

TRY IT OUT!

1 Dictate thoughts on the go

Speak naturally while walking or multitasking. Even if you use filler words like "um", Rambler summarises the core points into a clean, concise draft.

2 Polish messages hassle-free

Rather than manually deleting typos or pauses, review your transcribed text and refine or reformat it using a simple follow-up prompt before sending.

Less Social Distractions with HiLight

Pixel 11 Pro

Integrated into the rear camera bar, **HiLight** provides gentle, glanceable light notifications so you stay informed and connected without picking up your screen.

TRY IT OUT!

TRY IT OUT!

1 Stay present during dinners or meetings

Keep your phone face down, and HiLight will gently glow in a custom colour assigned to your favorite contacts (like a family member or babysitter) when they call.

2 Interact with AI hands-free

Receive soft visual pulses from HiLight to confirm that Gemini is thinking or responding without needing to turn your phone over.

Smooth Video Creation with Creator Suite

Located directly under the **Creator** tab in the camera video settings, **Creator Suite** acts as an on-device assistant to help creators like you record and edit polished video content right from the start.

TRY IT OUT!

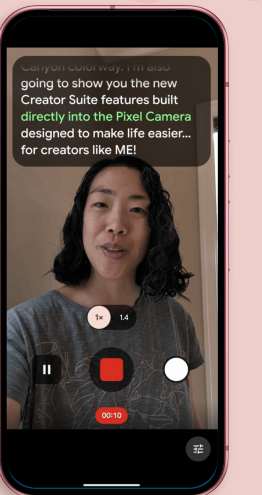

TRY IT OUT!

1 Record piece-to-camera content

Read smoothly from an on-screen scrolling teleprompter that automatically adjusts its scrolling pace and pauses to match your natural speech delivery.

2 Find your clips easily

Automatically save video captures straight into designated project folders, then trim and reorder your clips using a Google Photos-powered Storyboard before posting.

Spontaneous Life Moments with Magic Capture

Magic Capture analyzes around 500 frames of a dynamic scene to automatically pick out the best moments at HDR+ quality, letting you stay present in the moment instead of living behind your screen.

TRY IT OUT!

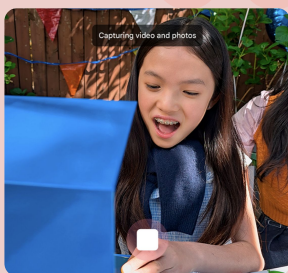

TRY IT OUT!

1 Photograph fast-moving events

Press capture once at family gatherings, sports events, or with active toddlers, and stay present while Pixel automatically captures clear action shots and genuine laughs.

2 Getting instant, share-ready photos

With your consent, Magic Capture automatically applies light edits—such as auto-cropping, straightening, or unblurring—where appropriate.

Looooooooooooong Distances with 120x Pro Zoom

Pixel 11 Pro

Capture distant details with extreme clarity with the **120x Pro Zoom**—powered by Google Tensor G6, advanced machine learning models, and a redesigned 48MP telephoto sensor that captures 30% more light.

TRY IT OUT!

Frame versatile shots

Shoot crisp 5x Portrait Mode photos from afar, or push zoom all the way up to 120x to capture fine details across extreme distances—like your favorite band member, sports player, or sunset you don't want to miss.
